DETAILED ACTION

Election/Restrictions

1. Applicant's election without traverse of Species I, claims 1-4 in the reply filed on November 1, 2010 is acknowledged. Claims 5-20 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to nonelected species, and there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on November 1, 2010.

Priority

2. Acknowledgment is made of applicant's claim for foreign priority under 35 U.S.C. 119(a)-(d).

Specification

3. **The disclosure is objected to because of the following informalities.**

Appropriate correction is required.

Regarding Page 45 Line 23, the term could be written as "...slits **169a**, **169a**"

Regarding Page 49 Line 13, the term could be written as "...cover-like member **191**"

Regarding Page 54 Line 19, the term could be written as "...bolts **221**"

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Drawings

4. The drawings are objected to because of the following informalities.

Appropriate correction is required.

Figures 23-30 should be designated by a legend such as --Prior Art-- because only that which is old is illustrated. See MPEP § 608.02(g). Pages 1-6 of the original specification refer to these figures as "Background Art" or that art which is old.

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(5) because they include the following reference character(s) not mentioned in the description: Reference No. 652 in Figure 26.

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "222" has been used to designate both bolts [Page 58 Line 8] and nuts [Page 55 Line 24].

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "49" has been used to designate both mounting part [Page 7 Line 26] and retainer [Page 28 Line 11].

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "43" has been used to designate both fuel tank body [Page 8 Line 3] and nuts [Page 28 Line 13].

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "51" has been used to designate both supporting part [Page 7 Line 26] and bolts [Page 30 Line 3].

The drawings are objected to as failing to comply with 37 CFR 1.84(p)(4) because reference character "52" has been used to designate both hollow space [Page 8 Line 1] and tank body [Page 30 Lines 5-6].

The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors in the drawings. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the drawings.

Corrected drawing sheets in compliance with 37 CFR 1.121(d), or amendment to the specification to add the reference character(s) in the description in compliance with 37 CFR 1.121(b) are required in reply to the Office action to avoid abandonment of the application. Any amended replacement drawing sheet should include all of the figures appearing on the immediate prior version of the sheet, even if only one figure is being amended. Each drawing sheet submitted after the filing date of an application must be labeled in the top margin as either "Replacement Sheet" or "New Sheet" pursuant to 37 CFR 1.121(d). If the changes are not accepted by the examiner, the applicant will be notified and informed of any required corrective action in the next Office action. The objection to the drawings will not be held in abeyance.

Claim Rejections - 35 USC § 112

5. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

6. Claims 1-4 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Regarding Claim 1 Lines 1-3, the claim states " A cover-mounting structure of a plastic container having a cover for closing an opening provided in a plastic container body at least part of which is made of a barrier material" This claim language is unclear as to what part of the assembly comprises the barrier material. Does the cover, the container, the assembly, or another part comprise of barrier material? Claims 2-4 are rejected as being dependent from rejected base claim 1.

Allowable Subject Matter

7. Claims 1-4 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Regarding Claim 1, the prior art discloses most of the claimed invention; however, the prior art does not expressly disclose an annular retainer fastened to the annular member while resting against an external surface of the cover.

Conclusion

8. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: see PTO-892 Notice of References Cited.
